

# STÉPHANE DUBOZE - DEVOPS ENGINEER

stephane858@live.fr • +32497650015 •

[LinkedIn : Stéphane Duboze](#) • [Site personnel : devops-by-stephane.fr](#)

---

## SUMMARY

Spent 6 years developing the skills to increase velocity, reliability, and quality with a high focus on security.

---

## EDUCATION

<b>YNOV France</b>	<b>Lyon -France</b>
Master of Cloud, Security & Infrastructure	2021 - 2024
Master of Cybersecurity	2021 - 2024
HND Digital Systems , IT and networks	2019 - 2021

---

## WORK EXPERIENCE

<b>BNP Cardif</b>	<b>Belgium / Netherlands</b>
Technical Application Manager	July 2025 - June 2026
<ul style="list-style-type: none"><li>Automated 30% of recurring manual operational tasks, reducing processing time by 35% tasks using Ansible and Power Automate, reducing processing time by 35% and improving overall team efficiency</li><li>Led vulnerability remediation across Windows servers, reducing Java and Apache Tomcat exposure by 80% through structured patch management and compliance enforcement</li><li>Strengthened IT governance by aligning production processes with internal controls and regulatory standards</li><li>Managed end-to-end incident resolution, including root cause analysis and preventive follow-up</li><li>Performed data corrections and extractions in production environments using Oracle SQL, GraphTalk AIA, and MS Access, ensuring data integrity across critical systems</li></ul>	

<b>Worldline</b>	<b>France</b>
Site Reliability Engineer	September 2021 - September 2024
<ul style="list-style-type: none"><li>Managed on-premises infrastructure across 100+ VMs in a SecNumCloud environment</li><li>Reduced Linux and container vulnerabilities by 60% through hardening policies</li><li>Deployed CI/CD pipelines with GitLab CI, reducing deployment failures and delivery times by 60%</li><li>Automated provisioning and configuration with Terraform and Ansible</li><li>Maintained a full monitoring stack (ELK, Grafana, Zabbix) and ticketing tools (Jira, ITSM) for proactive incident detection</li><li>Led incident management including root cause analysis across Red Hat/CentOS production environments</li><li>Successfully executed a lift-and-shift migration of 50+ VMs on-premise</li><li>Contributed to governance committees and drove DevSecOps adoption across infrastructure teams</li></ul>	

<b>Enedis</b>	<b>France</b>
Developpeur FullStack	September 2019- September 2021
<ul style="list-style-type: none"><li>Created and deployed multiple ReactJS modules and graphic templates, along with clear and thorough technical documentation.</li><li>Set up and optimized a Nextcloud platform to streamline file handling and sharing across the organization.</li><li>Developed a custom SMS and email delivery tool driven by company-specific rules.</li></ul>	

---

## SKILLS

- Cloud & Virtualization:** OpenShift, Kubernetes, Docker , Linux
- Infrastructure as Code (IaC):** Terraform, Ansible
- CI/CD:** GitLab CI, Jenkins, GitHub Actions
- Monitoring Tools:** Grafana, Zabbix, Prometheus
- Web Servers:** Apache, Tomcat, NGINX, NodeJS
- Database Systems:** MySQL, PostgreSQL, MongoDB, Oracle, MS Access
- Cybersecurity:** SIEM, F5 BIG-IP , Risk Analysis, Vulnerability Scans , Vulnerability Management
- Programming:** Bash, PowerShell, Python, JavaScript, PHP
- Languages:** French (Native), English (C1), Mandarin (A1)
